

NON ACID ALLOY WHEEL CLEANER (NEW)

Product description: A new non-acid wheel cleaner specially for alloy wheels.

Technical Characteristics: Also works well on stainless steel, chrome or on wheels with broken lacquer surface.

The strong cleaning action will lift off brake dust and heavy grime.

Available in 1L ready to use spray or 5L concentrate.

Directions for use:

Dilute the concentrate 1 part to 4 parts water and hand spray or pump spray onto the wheel, leave for only a few minutes and rinse off well with a hose or pressure washer. For heavy dirt, agitate with brush or cloth.

Don't leave on the wheel for long as this will cause staining.

Information

For professional use only. Always consult the MB Coatings Health and Safety data sheets. Always read the risks and precautions stated on the product label.

The information contained in these pages is not intended to be exhaustive, and all persons using the product without first obtaining confirmation from MB Coatings as to the suitability of the product for the intended use, does so at their own risk. Whilst every effort is made to ensure the information given about the product (whether in this sheet or otherwise) is correct, we have no control over the quality or condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree to do so, we do not accept any liability arising out of use of the product. All information contained in this sheet is liable to modification from time to time, and we reserve the right to change the product in accordance with our policy of continuous product development.
